

## 2 FREE Manure Management Workshops — Sign up early!

Do you need a manure management plan or is your plan out of date? All farms that generate or spread manure are required to have a written plan and are encouraged to attend one of these workshops! We will show you what the advantages are of having a plan, how to complete each step of the workbook, and how to implement the plan.

This plan needs to be kept for your records only: No government agency is required to review it or have it on file.

**Don't forget to bring a map or aerial photo of your farm. We will provide a workbook and free soil sampling kits!**
